

Practical Environmental Management Plus PEM +

PEM+ is a new 'fit for purpose' training course, supported by Barclays.

PEM+ adopts a phased approach to introducing environmental management into a company.

The training enables the delegate to develop, implement and maintain an environmental management system (EMS) that meets your company needs and requirements of the standards ISO 14001 and BS 8555.

There are five main elements to the course, made relevant by local speakers with "sharp end" experience, combining project work, workshops and classroom sessions. Progress on the course is monitored by portfolio assessments and a 1 hour examination.

Elements are covered in five sessions:

1. Commitment and Establishing the Baseline
2. Identifying and ensuring compliance with legal, customer and market requirements
3. Developing objectives, targets and programmes
4. Implementation and Operation of the EMS
5. Checking, Audit and Review

Successful candidates will be awarded a CIWEM training award and will have produced a set of documentation that will support a company in implementation of Phase 3 of BS8555.

Course dates scheduled (subject to confirmation):

Birmingham
