

practical environmental management

The prime objective of this training programme is to provide individuals with enough support to enable them to deal confidently and competently with environmental management in the work place.

The emphasis is on practical aspects of environmental management with a focus on specific topics relevant to environmental impacts from industry and introduces delegates to the requirements of the ISO 14001 standard.

The package comprises of 6 day training sessions and includes practical exercises and workshops delivered by an experienced environmental business services advisor. Cost **£375.00 (plus VAT)**.^{1&2.}

Subsidised in-company assistance may also be available, depending on eligibility. Please speak to a Groundwork Advisor for more information.³

Telephone: 01676 524 320 for more details.
