

COULD YOU PROFIT FROM USING LESS?

Envirowise is offering a unique opportunity to find out how your business can make significant cost savings through resource efficiency.

Getting more from Less through resource efficiency

7th February 2008

8.00 – 10.30am

Mercure Albrighton Hall Hotel and Spa
Albrighton, Shrewsbury, SY4 3AG

A workshop to help you reduce your costs

Learn about the true cost of waste and the recent changes in waste legislation. Learn how businesses can make considerable savings through becoming more resource efficient. Hear about the Business Environmental Support Scheme for Telford and how they, in partnership with Envirowise, have helped local businesses to make significant cost savings.

Who should attend?

This event is targeted at local businesses that are looking to make financial savings through resource efficiency and improve their environmental performance.

Why should I attend?

This unique event will provide you with examples of best practice from some of Shropshire's leading companies. You will also receive expert advice from Envirowise on how your business can increase profits by:

- Measuring and benchmarking your organisations environmental impact through the use of resources in your business.
- Reduce the carbon footprint of your business through improved utilisation of raw material supplies.
- Maximise the opportunities through greening your supply chain.

Advice, support and tools will also be available from Envirowise and local businesses to help your business manage the behavioural change needed to improve your long term sustainability.
