

Renewables Technology Audit '08

Solutions and business opportunities relating to energy, heat, and water challenges

25th February 2008 – 09.00-14.00
The Banqueting Suite – Birmingham Council House

MARKET DEVELOPMENT - a business led appraisal
BUSINESS OPPORTUNITY - reporting the realities
THE HURDLES - a business led identification of hurdles to progress

The world faces growing pressures from increasing global demand for energy. Resource supplies – including water – are under stress. Climate change creates threats and opportunities to businesses. The need for innovative solutions is paramount. But the investment needed to meet these challenges is enormous. The demand on the business community to deliver is growing.

But how are we doing? Away from the rhetoric and spin, what is the reality of delivery in the UK? How are we progressing? Are solutions finding their way to market? Is the political leadership strong and robust? What barriers stand in the way of progress?

This business led audit seeks to provide a national UK reality check

RTA '08 will provide practical evidence from key speakers. Open discussion sessions. The launch of a new initiative in the Midlands to explore the progress of renewables technology.

Subject areas will be:

Carbon Reduction Opportunities within the 'built' and 'to be built' environment
Sustainable Water Technologies
Biofuels for Transport and Power Generation
Small Scale Renewables

RTA '08 is presented by Environmental Business Communications Ltd in association with Birmingham City Council and BREW WM

RTA '08 is supported by The Midlands Environmental Business Company, The Business Council for Sustainable Development – United Kingdom and Government Office for the West Midlands

No Delegate Fee is applicable
