for your  
business

# FREE Seminar

### What will it cover?

This short seminar will provide you with the management tools to start looking systematically at the wastes produced in your business. Also to outline some of the practical actions that you can do in your company in order to minimise waste and improve efficiency. The areas covered will include:

- The true costs of waste
- A systematic approach to Resource Efficiency
- How to identify wastage in your company
- Establish a baseline using **Carbon Footprinting**
- Why we have to change the way we use resources
- Making a business case for Resource Efficiency

### Why attend?

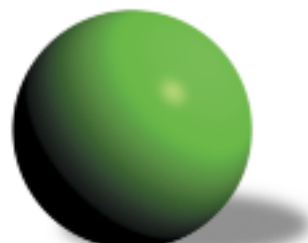

- To initiate action on Resource Efficiency
- Find out about Government funded support
- Pick up practical tips to help you minimise waste in your company to cut costs
- Network with other companies

### Who should attend?

- Those with responsibility for waste, material storage, site management or environmental management
- Those wanting to improve the company's environmental performance and cut costs

### Date and Location

- 5<sup>th</sup> Sept 2007 8.30am - 11.30am, breakfast provided.
- Venue: Groundwork UK, Lockside, 5 Scotland Street, Birmingham, B1 2RR.
